Stormdrains

It's raining cats and dogs – where will they all end up? Did you ever wonder where all that rain goes after falling on the street? Well, most of it goes down a storm drain and straight into the nearest stream. Any pollution it washes down the drain ends up in the creek, and eventually makes its way to the Chesapeake Bay. The same goes for anything else that goes down a storm drain, such as used motor oil or paint. So remember, **recycle** used motor oil, paints, solvents and anything else that can harm the water we depend on.

Don't send the environment down the drain.

To learn more about what you can do to prevent pollution of our local streams, rivers and waterways, visit www.rivanna-stormwater.org.
