

# Ragged Mountain Natural Area Quality/Integrity Ranking of Plant Communities

**DRAFT**

- = Areas heavily impacted by reservoir expansion construction. In greatest need of restoration.
- = Areas heavily impacted by invasive species. Prevention of spread needs careful planning.
- = Relatively mature plant communities with moderate to minimal exotic species impact.
- = Mature plant communities (75-120 year old) with minimal to no exotic species present.
- = Water. High Potential for Wetland development in a few new areas. Monitor for invasives.
