12/11/2014			Asked about the Court Square sign about the slave block. It was taken down and put down as a small foot print on the sidewalk. This is a significant piece of history for Court Square, and he asked if this can be corrected.	Albert Saunders		Mayor Huja said the property owner did not want it on her property and removed the slate marker. Mr. Tolbert said the Historic Resources Committee are also doing a series of markers around Court Square, and there will be a more detailed marker installed near that area around January/February.	The Historic Resources Committee is working on this project.	N/A
12/11/2014		Hazel Street	He thanked the Police Department and the Fire Department for their hard work during this stressful year. There is a lot of traffic on Hazel Street, and many young children are now living on the street who walk to Burnley Moran or walk to the bus stop on Locust Ave. He asked that the criteria for the traffic list of priorities be made public after they are developed, and that the priority list also be made public. He suggested the priorities be listed in the newsletter with the utility bills for those who are not computer literate.	Bob Knight		Ms. Szakos said if people need to get information from the website, they can call the Clerk or go to her office for assistance. Ms. Smith said there is a new GIS viewer that shows where all the community capital projects are. Mr. Tolbert invited the community to the Carver Rec Center on Saturday for the Streets That Work presentation. This will provide more background on the prioritization process.	Concern answered at meeting	N/A
12/11/2014		Park Street	Difficult to enter traffic onto Park Street from Watson Ave. She asked to plan now for crosswalks that say do not block access before the lights are activated. It is also needed for Davis Ave., which also has the same problem	Virginia Amos		Ms. Szakos said has spoken with staff and they are planning to do it once the lights are functioning. Mr. Tolbert said they plan to do it concurrent with activating the lights, sometime around January 10	Completed	N/A
12/11/2014			Requested to end the R2 zoning designation. His neighbor has build a second unit within five feet of his property line, and now he has no privacy. Also parking will be an issue once his neighbor has tenants.	Tony Carbenelli		Mr. Tolbert said it is not R2 zoning; it is actually any accessory apartment that complies with code. Ms. Smith said there was an issue with R2 zoning in her neighborhood. They requested a comprehensive look at the entire city. Ms. Szakos said she supports auxiliary dwelling units to keep the character of the city while getting more people in walking distance of the city with affordable housing. Ms. Galvin said accessory dwelling units are an important tool to dealing with our affordable housing. We are looking at our code, and perhaps there is some room for adjustments. Mr. Fenwick said we all came to Charlottesville for a reason. The community needs to think about how we can maintain the character of our city.		N/A
12/11/2014		East Jefferson	People use E. Jefferson as a thoroughfare and go way too fast. The neighborhood missed the 50% mark needed to install speed bumps. She said if a police officer parked at Fairway for a month or two, people may learn to slow down. This is also needed at 9th Street. There are not enough 25 mph signs - people forget when there are two lanes and think they can go faster	Shauna West	NDS	Ms. Szakos said one of the ideas of Streets That Work is to use the shape of the street to encourage people to go the speed limit naturally. Bump outs are crosswalks and other visual cues can help slow traffic. Mr. Fenwick said he would like to see a 25 mph zone throughout the city.	Streets that Work may provide some guidance on these items.	N/A
12/11/2014			Motion detector lights should be installed at the City Walk project to prevent constant lighting in this area	Shauna West	NDS	Mr. Tolbert said he will get in touch with the developers and give Ms. West his number so she can follow up with him on what he finds. Mr. Fenwick said lighting helps people feel secure; we should look for middle ground.	Staff will working with the contractor of Citywalk to assure that lighting is compliant. Dialogue with the neighborhood has occurred at each step.

12/11/2014			There is a light in front of his house that is unshielded that shines directly into his bedroom window. He has spoken to staff about it for years and is told we are hostages to Virginia Dominion as far as street lighting is concerned. He asked if it is possible to move to LED lighting. VA Power charges more per month for LED lights when they actually use less electricity. He said other cities have gone to all LED lights and have paid for it in savings within seven years. There are companies that will do a lease - purchase on such a project	Harry Rolston	PW	Ms. Galvin said VA Dominion has the power of eminent domain, and he thinks this may be appropriate for a legislative package.	We can take no action. It is up to VML (Virginia Municipal League)	
12/11/2014		Bellevue	There are signs on Locust prohibiting trucks over 2 axles. They have heavy trucks and trailers travelling Bellevue;; they should not be allowed	Margaret Causey	NDS	Mr. Tolbert said staff can examine this. Ms. Smith said we need to look at this holistically so we are not just shifting the problem to another street	Will be addressed via Streets That Work	TBD
12/11/2014		Hazel Street	She had to pay to install a sidewalk that leads to nowhere and not being able to pave a gap in her sidewalk without installing an apron on the driveway. She said building her house in the city cause a lot of issues, such as having to cut off a portion of the exterior of her home because she was encroaching on the setback by 3/4 of an inch. She said her experience building in the county was much more pleasant.	Zoe Edgecombe	NDS	Mr. Tolbert said this is a building code issue, and the regulations are strict. Mr. Huja asked staff to look into these issues. Mr. Fenwick said we need to show some common sense with these types of issues.		
12/11/2014		N. Downtown	50 year resident, thanked the police and fire department, and CARS. He asked council about using CCTV cameras to add security to our city.	Richard Crampton	Police	Mr. Huja said we are discussing this at an upcoming city council meeting. Ms. Szakos said we are working on crime, but statistically our crime rate has actually dropped over time.	Proposal is now before council. Further information has been requested and Chief Longo is gathering information for future consideration by council.	On Going
12/11/2014			Most of her house backs onto the Northeast Park. The court and playground is maintained, but the rest of the park is not.	Joy Leonard	Parks and Rec	Mr. Daly said he would speak with Ms. Leonard personally to see which portion of the park she is speaking of.		Staff met with Ms. Leonard on site at the park the week following the town hall and a cleanup day was held in March
12/11/2014			Construction and traffic signals on Park Street	Rory Nichols	NDS	Mr. Tolbert said the interchange project is being completed, and traffic signals to control traffic are part of the project. These will be turned on within 30 days. The completion date for the project is January 10, including the parkway, interchange and traffic signals	The traffic signals will become active prior to completion of the interchange project.	Summer 2015
12/11/2014			A citizen asked how pedestrians get from McIntire to the park			Mr. Tolbert said there will be a sidewalk on the west side that will go under the ramps at the signals and a multiuse path on the east side, which will go all the way to CATEC when it is done. Ms. Smith asked Mr. Daley to explain how the multiuse trails will be used. Mr. Daley said they are generally wider and can be used by pedestrians and cyclists. They are intended to activate trail connections to allow access to the downtown and the Rivanna River, and access from the Water Street trail as well.		N/A

12/11/2014			Great to have recreational use in the city, such as the Skate Park. It would be great to have lights at the Skate Park to extend hours in the summer. Also, the Rivanna River is an amazing resource. It would be great to have river access for boats, perhaps at the recently decommissioned pump station.	Garnet Mellon		Ms. Szakos said local leaders are talking about rivers and are both working on trails to go alongside the entire river. This is a great idea. Ms. Smith asked Mr. Daley to give an update on the Skate Park. Mr. Daley said the design is in process; the design team will meet next week, and a final public open house will be held around the first of the year. The new Skate Park will be lit. Ms. Galvin asked if the RWSA Director has been in touch about the future use for the old pump station. Mr. Daly said elevation to the river is substantial, and the type of watercraft permitted would have to be discussed. We have been working with Rivanna on the pump station location.		Skate Park design approved by Council March 16, including lights for the entire skate park. Riverview Park/boat launch a larger discussion. We may need to initiate a Master Plan process for Riverview Park to iron out issues about boat launches, restrooms, et.
12/11/2014			Lifelong area resident, said as a pedestrian bus rider, our bus service is worse that it was before the improvements. There is no service on the weekends for Route 1, service is only once an hour, and night service ends at 9 pm. City bus service to an area with a new development is counterintuitive to discouraging vehicular traffic. She anticipates that there will be increasing traffic issues on Meade Ave. because of development in the area. The small bungalows in her neighborhood are being bought and converted into double or triple the square footage. This is not about affordability	Beth Norford		Mr. Fenwick said this speaks to the character of the city and the density. This is up to the citizens of Charlottesville. He said speak to John Jones at CAT; he and his staff can come to your neighborhood association meeting to discuss the issues. Ms. Galvin said the housing replacement is not a question of density, but it is a question of form and character of the neighborhood, and this is something we can examine as we go through out codes.		
12/11/2014		Midway Manor	Has spoken to Council several times about the use of synthetic, chemical pesticides on city property and in school parks. He asked for a written chemical management policy, such as the one Albemarle County uses, that regulates the types of all pesticides, including herbal pesticides.	John Cruickshank				Draft IPM policy on Council Agenda April 20, 2015
12/11/2014			There is highway-type lighting on all the side streets. We should consider transitioning into more pedestrian lighting on these streets	Ann Hemingway		Ms. Mueller said we have no control over what lights Virginia Dominion uses, but we still try to work with them to see what we can do. Unfortunately, there are not a lot of options. Ms. Smith asked if we can request not to use their lights and replace them on our own. Ms. Mueller said this is not an option financially	Concern resolved	
12/11/2014			Form based code is a great idea. He likes the possibility of the city buying their own lights and asked if we could look into purchasing LED lights for a long-term project. He encouraged the parks dept. pursuing the idea of a mini-park in the Martha Jefferson neighborhood. Locust Ave. can be a great example of street calming with serpentine element.	Bruce O'Dell		Ms. Smith said a park in MJ neighborhood is on the Council's agenda	Resolved.	
12/11/2014			His house overlooks the eastbound entrance ramp of 250, and he notices at least two accidents a week. He said this is a difficult merger and will likely get worse when the bypass opens.	Erick Kaplan		Mr. Tolbert said this was a major part of the review when FHA reviewed the plans, so he hopes the project will improve sight distance and increase gaps for entrance onto the bypass. Ms. Smith said perhaps we can collect police records	On going staff will monitor accidents	Ongoing

12/11/2014			Birdwood Neighborhood is coming to the next NDRA meeting to address concerns about Hillcrest Road. He said this should be considered for two way traffic. The meeting is December 18, 7 pm at the library	Mark Kavitt			Announcements no follow up necessary	
12/11/2014			Owner of the Spectacles Shop, said he supports looking at lighting in the neighborhood as well	Jon Bright			Announcements no follow up necessary	
12/11/2014			Lexington is used as a cut through, with the first stop at Poplar Street with children waiting for a school bus. Traffic coming from Park to Evergreen goes too fast, and there is no stop sign on Lexington at the Poplar Street intersection.	Vera Mason	NDS
